CRESTRON A/V System Instructions | CR001

01 Crestron Control Panel

• If the touch-screen shows no image, touch it once to activate it.
• Press the <PWR> button to power on the Crestron A/V System. It will take a minute for the system to start up.

02 Powering System On

• If the touch-screen shows no image, touch it once to activate it.
• Press the <PWR> button to power on the Crestron A/V System. It will take a minute for the system to start up.

03 Selecting Input

• Input source buttons are located on the left side of control panel's screen: <PC> (computer/laptop)
• Press an input source button to project the desired input. It may take a second for the source to change.

04 Connecting a Laptop

• Input source buttons are located on the left side of control panel's screen: <PC> (computer/laptop)
• Press an input source button to project the desired input. It may take a second for the source to change.

05 Adjusting Volume

• Use <VOL > (volume up), <VOL < (volume down) and <MUTE> to adjust the volume of the selected input source.
• Press one of the above buttons and hold it if necessary to increase or decrease volume. You may have to increase the volume to 75% to hear it.

06 Utility options

• Pressing the utilities button will allow you turn the projector power On and Off.
• Please use the Blank button for quicker access to the projector.

08 Powering System Off

• If you do not see a projection, try restarting the system by pressing the PWR button. Press the YES button to confirm. It will take 1-2 minutes for the system to restart.
• If there’s no sound, press <MUTE> twice to mute/unmute the system then turn the volume all the way up from the control panel. Also ensure that the volume of your device is about 75%.

Trouble-Shooting

• Make sure the VGA and audio cables are completely plugged into the laptop.
• NOTE: Laptops will not automatically project when connected. You may need to activate projector mode on your computer using the Windows key + P (for Windows machines). Select “duplicate” mode on your computer.
• Mac users should ensure Mirror or extended mode is activated in you System settings.
