**Document Camera**

Touch the Doc Camera button to display images from the document camera onto the projector screen.

Normally the document camera is turned on automatically at system startup but should no image appear, please ensure the document camera is turned on.

---

**Laptop/Personal Devices**

Touch the Laptop button to display your personal device onto the projector screen. VGA, HDMI, and wireless (Air Media) connectivity are available.

Press the DVD button to play DVDs or the VCR button to Play VHS tapes.

Normally the combo player is turned on automatically at system startup but should no image appear, please ensure the DVD/VCR is turned on.

---

**DVD/VCR**

Touch the DVD/VCR button to display the DVD/VRC player onto the projector screen.

To activate projector mode on windows computers when using VGA or HDMI, install the air media app for wireless presentation on Windows, Mac, Android, and iOS devices.
