5 Source Selection

Launch Projector control from Desktop

02 Powering System On

• Turn on PC located in the instructor podium.
• Select the Presentation Account
• Double click the Projector control icon located on the desktop.

03 Selecting Input

• Click on E-control to turn the AV system on. It will take less than a minute for the system to start up.

• Use <VOL Up>, <VOL Down> and <Mute> to adjust the volume of the selected input source.
• Press one of the above buttons and hold it if necessary to increase or decrease volume. You may have to increase the volume to 75% to hear it.

04 Connecting a Laptop

• Select <PC> on the AV control panel. Laptop must be selected there after.

• Plug the VGA cable into the VGA port of the Laptop, preferably before turning it on.
• If you are using VGA and plan to play sound, ensure that the audio cable attached to the VGA cable is connected to the headphone port of your Laptop.

• Input source buttons appear on the left side of control panel screen: <PC>, <Laptop> <VCR> and <DVD>.
• Select a source button to project the desired input. It may take a second for the source to change.

05 Connecting a Laptop

• Press the <PC> button on the control panel
• Select Desktop to project the instructor’s PC.

06 Operating DVD and VCR

• When <VCR> or <DVD> input sources are selected, operating commands for the built-in VCR and DVD players appear on the screen (see illustrations above). You can also use the controls on the VCR/DVD player.

• Make sure the projector is working by trying a different source (PC, VCR or DVD) and see if an image appears on the projector screen.

• Press the <PC> button on the control panel
• Select Desktop to project the instructor’s PC.

07 No Image?

• If you do not see an image, try restarting the system by pressing the <Shutdown> button. It will take 1-2 minutes for the system to completely shutdown.

• If you’re still having issues, try restarting the system by pressing the <Shutdown> button. It will take 1-2 minutes for the system to completely shutdown.

• If there’s no sound, press <Mute> twice to mute/unmute the system, then turn the volume all the way up from the control panel. Also ensure the volume is up on your device.

• If you do not see an image, try restarting the system by pressing the <Shutdown> button. It will take 1-2 minutes for the system to completely shutdown.

No Sound?

• Make sure the VGA audio cable is completely plugged into the laptop.

Image cut off or missing?

• Make sure that your computer’s resolution is set to 1024 x 768 at 60 hertz

No connection?

• NOTE: Laptops may not automatically project when connected.

• You may need to activate projector mode on your Laptop using the Windows key + P (for Windows machines).

• Select “duplicate” mode on your computer.

• Mac users select “Mirror Displays” from the “Display” settings in your “System Preferences”

Need to Blank screen?

• Use the <Video Mute> button to toggle blank/display images from the projector.

• If you do not see an image, try restarting the system by pressing the <Shutdown> button. It will take 1-2 minutes for the system to completely shutdown.

• If you do not see an image, try restarting the system by pressing the <Shutdown> button. It will take 1-2 minutes for the system to completely shutdown.
